

# Student Events at Academy 2018 San Antonio

## Basic Information:

Students can attend all continuing and scientific education courses at no additional charge (additional fees apply to workshops and leadership courses). Scientific Papers consists of 15 minute presentations on the latest advances in science. Both Scientific Papers and Posters offer the latest advances in science or contemporary management of interesting clinical cases. Pick up a green sheet at the registration area for a list of all activities by time. Attire for the meeting is business casual.

Since advanced pre-registration for sessions is not required, popular sessions tend to fill up quickly and may be standing room only. Please be cognizant that many doctors have paid a large registration fee (on top of travel expenses and lost income) in order to attend the meeting. If you are willing and/or able to offer your chair to a doctor standing at the back of the room, the gesture would be greatly appreciated!

## Student Events:
